Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 19-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Bahl (US6072160).

Bahl discloses a lamp for use as a heat source comprising an illuminant/filament coil (161; 350), a light emitting part (162) covering the illuminant, a reflective part (160, 300), wherein light travels in a perpendicular direction (column 5, lines 58-60), an electrode part (53) to which power is supplied and filament coil is parallel to projection face (350, Figure 6b) and is a surface light source, reflective part has a gold reflective film on an inner surface (column 5, lines 44-46), a support member (82) on which an object (81) is placed, and a plurality of lamps above the support member (Figure1).
